solutions

An extensive range of optimal casing solutions

ViskoTeepak™ offers the largest selection of fibrous casings. Our offering gives you all the advantages of high quality fibrous casings: the widest diameter range, excellent calibre consistency and curing properties, as well as numerous coating, colour and printing options.

The ViskoTeepak™ Fibrous casing, with its superior stretchability and permeability, is a perfect choice for all applications, such as smoked or cooked sausage and ham products. Fibrous casings are typically used in products that consumers associate with the reliable quality of household brand names.

Properties to match the quality of your products

Thanks to their high calibre consistency and mechanical strength, ViskoTeepak™ Fibrous casings perform reliably in all stages of processing.

Excellent handling features ensure easy stuffing, both manual and mechanical, while meeting the strictest requirements for food

safety and hygiene. Fibrous casing is also a biodegradable product based on natural, renewable raw materials.

Fibrous casing is light but strong, with excellent stretchability for improved yields. Thanks to its high permeability, you can also reach superior quality in the smoking and cooking cycles.

As you like it

Fibrous casings can be delivered in flat or pre-tied pieces, bundles or reels, and in shirred strands to suit your high-speed stuffing requirements, dry or pre-moisturised. A large range of colours are available to give your end products a pleasant and sales-boosting appearance. In addition, the good printability of ViskoTeepak™ Fibrous casings enables effective brand differentiation on retail store shelves.

The basics of Fibrous

ViskoTeepak™ fibrous casings receive their unique properties from a combination of a specially made paper base and a natural cellulosic covering. The paper base imparts strength and dimensional stability making it the best choice for high speed sausage production

plants. The cellulose impregnation provides permeability to water and smoke, and lets the casing stretch and shrink in accordance with the specific processing requirements of small or large scale producers.
