Added value to your product through visual impact

The appearance of a specialty product is easy to achieve with **ViskoTeepak™ net casings**. The eye-appealing net shapes give your sausages a pleasant “hand-made” look and feel. To the discerning consumer, this traditional look implies premium quality and delicious taste.

We have a wide assortment of non-elastic or semi-elastic nets, with shapes varying from popular honeycomb to geometric patterns such rectangular or square shapes, some of which are registered. The net forms an integral part of the casing, and adds value to your product through its unique visual appearance.

ASSORTMENT OF NETS

Net type	Structure	Clipped	Shirred
Honeycomb	elastic	yes	yes
Honeycomb	semi-elastic	yes	yes
Square/rectangular	elastic	yes	yes
Diamond	elastic	yes	yes

Different shapes available on request.

Not just for looks

As is the case with all ViskoTeepak™ products, the net family casings feature high mechanical strength and calibre stability to match the needs of your product range. Optimal process control provides the right solution for different applications; the level of adhesion and peelability, for example, can be precisely modified.

The casings are remarkably easy to handle and fast to stuff. Dense stuffing for better yield and an even curing process are also made possible by the industry-leading properties of ViskoTeepak™ fibrous casings. The net casing can be supplied clipped and shirred.

HOW TO CHOOSE

The basics of Fibrous

ViskoTeepak™ fibrous casings receive their unique properties from a combination of a specially made paper base and a natural cellulosic covering. The paper base imparts strength and dimensional stability making it the best choice for high speed sausage production

plants. The cellulose impregnation provides permeability to water and smoke, and lets the casing stretch and shrink in accordance with the specific processing requirements of small or large scale producers.
