

FIBROUS

One company – more solutions

Fibrous XL

**Flexible casing
for higher yields**

Flexible casing for higher yields

The light yet exceptionally strong **ViskoTeepak™ Fibrous XL** enables higher yields in sausage processing, which in turn translate into better overall profitability of your manufacturing operations.

Improved yields are naturally the main goal of every meat industry producer today, and Fibrous XL is all about delivering them.

Stretching the limits – boosting the profits

Thanks to its excellent stretchability, Fibrous XL is flexible but still utterly reliable and easy to handle. This strong casing enables safer stuffing of cold salami emulsion, for example. There is also less reject due to the casing's high mechanical strength. At the end of the day, higher yields mean higher output that improves your profitability.

Good permeability and wrinkle-resistance make Fibrous XL the perfect choice for

semi-dry smoked/cooked sausages, portion sausages and a truckload of other high-quality

HOW TO CHOOSE

The basics of Fibrous

ViskoTeepak™ fibrous casings receive their unique properties from a combination of a specially made paper base and a natural cellulosic covering. The paper base imparts strength and dimensional stability making it the best choice for high speed sausage production

plants. The cellulose impregnation provides permeability to water and smoke, and lets the casing stretch and shrink in accordance with the specific processing requirements of small or large scale producers.
