At ViskoTeepak, our goal is to ensure that our customers get the highest quality products with expert support for efficient, reliable production. By working closely with Marel, we're developing deeper expertise on their latest equipment, enabling us to provide even better guidance and troubleshooting support for you. This partnership means we're continuously improving our understanding of the technology you use, so that you can benefit from optimal settings and minimize downtime.

Advancing Our Partnership with Marel

Our long-standing collaboration with Marel recently took a big step forward with the installation of their newest stuffing machine, the LK 450, in our Brno Innovation Center (IC). This installation, provided by Marel, allows us to test and fine-tune the machine to meet the highest standards.

Training for Enhanced Support

Just a few weeks ago, we welcomed a group of Marel's technicians to our Brno facility for a dedicated training session led by Global Product Specialist, Emile Burgers. Emile shared his extensive experience with Marel's team, ensuring they're well-prepared to support customers in achieving ideal machine settings and troubleshoot common issues with ViskoTeepak casings.

"I want to thank you for hosting us at your facility. I hope our employees gained valuable insights that will enhance customer support. They shared positive feedback on how the training improved their understanding of casing behavior and machine handling."

- Emile Burgers
