Earlier this season, ViskoTeepak welcomed partners from across continents to our factory. The visit was about more than strengthening existing cooperation — it was an opportunity to create new partnerships, exchange knowledge, and explore shared visions for the future.

A highlight of the visit was the Innovation Center training, where participants gained hands-on experience with our machinery and processes, from emulsion mixing to troubleshooting. Just as important were the open discussions, which allowed every company to share perspectives and strengthen trust. These exchanges reinforced the value of personal connections in building long-term cooperation and driving innovation together.

By bringing people, ideas, and expertise together, we continue to deepen relationships and confirm our commitment to being a reliable, forward-looking partner for years to come.

“Together, we keep moving forward – with innovation, collaboration, and continuous improvement as our cornerstones.”
