New Features on Partner Network: Estimated Lead Times and More to Come

At ViskoTeepak, we want our Partner Network to be more than just an information hub — it should be a practical tool that makes your daily work easier. That's why we are introducing new features designed to give you more transparency, faster access to information, and better support.

Estimated Lead Times

The first update is the new Estimated Lead Times page. Here you'll find an overview of expected production lead times for our key product groups. This helps you plan ahead, set clear expectations, and stay aligned with your own schedules. Lead times are updated at least once a month to reflect changes in production capacity, material availability, or other factors.

Coming soon: Sample Overview

The next feature, soon to be released, is the Sample Overview page. Similar to the existing Open Order Overview, it will provide an at-a-glance view of your sample orders, making it easier to track requests and follow progress from one place.

Looking Ahead Together

These updates are just the beginning. More improvements will follow, and we will announce them as they go live. To make sure Partner Network develops in the right direction, we encourage you to share your thoughts through the feedback form on the site. Your ideas and suggestions help us improve — and ensure that the platform continues to grow with your needs.
